PROFILE

Motivated and dedicated Front-end developer with a solid grasp of JavaScript ,React.js ,java and MySQL. Skilled in responsive and dynamic user interface, I thrive on crafting visually appealing and functional web application. I am adept at collaborating with teams to deliver high-quality projects efficiently.

PROJECT

WhatsApp UI Clone - HTML,Css,Tailwind-css [Live](#)

- Successfully developed a replica of the WhatsApp user interface using HTML, CSS, and Tailwind CSS.
- Implemented key features such as chat bubbles, user profile, chats, updates, calls, contact details, settings and message timestamps to closely mimic the original design.
- Demonstrated proficiency in HTML, CSS, and Tailwind CSS through the development of responsive and visually appealing UI components

Form validation - HTML,css,JavaScript [Live](#)

- Developed a form validation project using HTML, CSS, and JavaScript to ensure data integrity and user input validation.
- Implemented validation checks for fields such as username, email, password, and password confirmation to enhance user experience and prevent erroneous submissions.
- Demonstrated proficiency in HTML, CSS, and JavaScript by creating responsive and interactive form elements with dynamic validation functionality.

Guruz Web Clone - HTML,Css,Tailwind-css [Live](#)

- Developed a clone of the Guruz website, a popular online learning platform, to gain practical experience in front-end web development.
- Utilized HTML, CSS to build the user interface and implement interactive elements. Employed CSS frameworks Tailwind CSS for styling and layout consistency.
